

10K BOAT LIFT 4 POLE MOUNT

Our lifts come standard with stainless steel pile-mount hardware for maximum strength and corrosion resistance.

Each system includes:

- Six 5/8" x 14" or 16" stainless steel pile-mount bolts
- Four 3/4" x 14" or 16" stainless steel hanger bolts
- Ten extra-large backing washers

This heavy-duty stainless hardware package helps protect your boat lift pilings, reduce wear, and promote long-term structural longevity in harsh marine environments.

Upgrading to our E-gear Motor System equips your lift with dual 1HP motors, delivering increased torque, and improved reliability under heavy loads.

*Comes standard 12', 13', 14' 6" length lifting beams
(additional length is an up-charge)*
